

IN THE CLAIMS

Claim 5, 6, 15 and 16, change "environment" to --chamber--.

REMARKS

This Supplemental Amendment is being filed in order to correct certain errors and clarify certain language used in the prior Amendment filed on or about March 20, 1995.

On page 8, line 5 and the newly added line 6, of the Specification, a correction is being made to indicate that the numeral "21" is to be associated with the inlet valve body. This is in conformity with the rest of the Specification, for example, page 8, line 21, wherein the numeral "21" is associated with the inlet valve body, while the valve is designated by the numeral (4, 21), for example, at page 9, line 16.

On page 14, line 12, the amendment to the original term "an especially great negative pressure" is now being changed to "an especially large partial vacuum" in closer conformity therewith. A similar change is being made at page 14, line 22, wherein the original term "a great negative pressure" is now being changed to "a large partial vacuum pressure". With regard to the change of the term "negative pressure" to "partial vacuum", see the remarks made in the Amendment filed on or about March 20, 1995, at page 13, lines 2-3. Applicants believe that the changes now being made more accurately reflect the original terminology.

In addition to the above, applicants wish to clarify that the term "atmospheric pressure environment" which replaced the term "overpressure relief chamber" and variations thereof on pages 3, 5,
